

Examiner-Initiated Interview Summary	Application No.	Applicant(s)	
	09/605,289	LIPSON ET AL.	
	Examiner	Art Unit	
	Sheela C. Chawan	2624	

All Participants:
Status of Application: _____

 (1) Sheela C. Chawan.

 (3) Mr. Hugh h. Matsubayashi.

(2) _____.

(4) _____.

Date of Interview: 26 May 2006
Time: _____

Type of Interview:

- ☒ Telephonic
☐ Video Conference
☐ Personal (Copy given to: ☐ Applicant ☐ Applicant's representative)

 Exhibit Shown or Demonstrated: ☐ Yes ☐ No

If Yes, provide a brief description: _____

Part I.

Rejection(s) discussed:

N/A

Claims discussed:

17

Prior art documents discussed:

N/A

Part II.

SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:

Amend claim 17 by adding claim 22.

Part III.

- ☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.
☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.

 (Examiner/SPE Signature)

 (Applicant/Applicant's Representative Signature – if appropriate)

Claim 17 (Currently amended): A method for inspecting an object comprising the steps of:

(a) applying a first model having a first set of attributes to a region of interest around the object, wherein the step of applying the first model comprises the step of applying an image model to the region of interest to detect image properties of the object;

(b) applying a second model to the region of interest around the object, wherein the second model has a second set of attributes, wherein the second set of attributes differs from the first set of attributes by at least one attribute, wherein the step of applying the second model comprises the step of applying a structural model to the region of interest to determine structural features of the object; and

(c) applying a third model to the region of interest around the object, wherein the step of applying the third model comprises the step of applying a geometry model to the region of interest to detect geometric properties of the object.

Claim 22 (canceled)
